

Team Dental at River Oaks

Summer 2010

Keep Your Secret!

Actual patient of Dr. King

With *Invisalign*®

We're very excited to introduce you to *Invisalign*®, a revolutionary orthodontic technique that has improved the smiles of thousands of patients. *Invisalign* uses a series of clear, removable aligners to gradually straighten teeth. The aligners are comfortable, and because they're made with medical-grade plastic, they're virtually invisible. No more metal mouth means you'll smile more during treatment, and you'll spend less time in our office having adjustments! Because the aligners are removable, daily brushing and flossing are not affected in any way, and you can eat anything you fancy!

Invisalign Open House Special ONE Day Offer!

Tuesday, August 10th, 2010 from 4:00pm – 7:00pm

\$900 OFF complete set of Invisalign braces

Financing available – 0% interest – monthly payments as low as \$89/month

To be eligible to be invisible, you must have had an oral exam done within the past year and all major cavities filled. No exam completed, no worries, we can take care of you at our office.

Hurry – seating is limited to the first 25 patients!

Call for details and to setup your exclusive appointment.

Don't Tell! They Won't Know!

Mini dental implants

Who wouldn't want to look better, speak better, eat better ... and smile more? Mini Dental Implants are now the first choice for many people who need to replace missing teeth or stabilize dentures.

Mini Dental Implants are FDA approved and the procedure can be performed right here in the office with only a mild anesthetic. Very strong metal implants, that are similar in diameter to a toothpick and look and act like the roots of teeth, are placed in the jaw. By modifying the patient's denture so that it can snap onto the implants tightly and reliably, many patients are able to speak and eat with confidence – for the first time in a long time.

As long-lasting as the results are, placing Mini Dental Implants takes only about an hour. Because the procedure is minimally invasive, and the implants are tiny, there is no healing period after placement and no stitches are required. The denture can be snapped in immediately. In fact, most patients are able to eat a light meal within only an hour or so after having the mini implants placed. An additional welcome benefit to patients is the ease of home hygiene care. With a little practice, the denture is easy to remove and replace.

With Mini Dental Implants, your friends won't know how you're looking so good – but you'll feel so great you might just want to tell them!

It Could Be Related!

Dental origins

Millions of people suffer from discomfort that only seems unrelated to dentistry. Do you have any of these symptoms? Tender jaw muscles... restricted jaw opening ... clicking or grinding jaw joints ... earaches ... facial or head pain? Call us. Dental intervention may help.

Here are some discomforts that may be dental in origin...

■ **Temporomandibular Disorder (TMD)** can create head, jaw, and ear pain when the jaw joints

located just in front of your ears become misaligned or traumatized, or when surrounding muscles become strained.

■ **Chronic, heavy snoring** can interrupt breathing and usually occurs when your lower jaw and tongue drop back during sleep.

■ **Headaches** can be related to TMD, interrupted nighttime breathing, and nighttime tooth grinding.

Oral Cancer Bites

Start early & win!

Oral cancer victims are getting younger. Many of these young adults don't smoke, chew tobacco, drink, or have diabetes or HIV. Scientists suspect another culprit – the *human papilloma virus (HPV)*. Most types of this virus are relatively harmless – they cause warts, for example. However, some transmittable forms have been linked to oral cancers.

Regardless of cause, visual monitoring is essential for early cancer detection at any age. Starting in your mid-teens, get into these preventive habits...

A Check your tongue, lips, cheek lining, and gums.

B Let us know about sores or ulcers that bleed easily or do not heal, white or red patches or lumps that don't go away, and lingering soreness.

C Share with us any difficulty you have with chewing, swallowing, or speaking.

Make self-screening your life's work. With early detection, most oral cancer can be cured.

Go The Distance

If you are in the public eye or just the apple of someone's eye, cosmetic veneers can really take you the distance. Long-lasting veneers can whiten teeth that have been badly stained or damaged, PLUS they can camouflage many other flaws. When veneers are sculpted to alter the proportions of your smile, they also re-proportion the lower third of your face, improving its esthetic balance. All this can be found at the dentist's office!

In only one or two visits, without surgery or orthodontics, veneers can...

- Repair chips;
- Cover stains and fillings;
- Close gaps between teeth;
- Recontour your gumline;
- Widen your smile to fill in the gaps at the corners of your mouth;
- Plump up your lips and the fine lines that accumulate from time or smoking.

There's more to veneers than esthetics. It's true that veneers are so thin

that they reflect light like your natural enamel, but they are also so strong that they can actually strengthen your teeth. In addition, they resist bacteria, contributing to oral health.

Cosmetic veneers, the perfect blend of science and artistry, are only a phone call away. Durable, reliable, and long-lasting ... they go the distance!

Is Your Smile ... Spotted?

Let us help you to lighten up!

It was a great photo. You were caught in the middle of a "full-on" laugh. Then you noticed the old, silver, amalgam fillings and realized that your entire dental history is on display! No need to be self-conscious any longer. There is a simple and attractive solution to the problem.

According to research, the demand for natural-looking white composite resin fillings has surpassed silver amalgam by a ratio of more than 3:1! These fillings are more natural looking than amalgam, and have the added advantage of never discoloring surrounding or neighboring teeth as older amalgam fillings have been known to do. Modern materials and processes ensure that they are also durable, reliable, and predictable.

Because of these advantages and high consumer demand, we have recently restocked one of the finest composites available. This material can be so precisely color-matched to your teeth that it will be invisible to the casual observer.

Let's talk about concealing, once and for all, your "dental history" with composite fillings. It can usually be done in only one visit or two, and because your silver fillings could be upwards of 15 years old, your insurer may cover replacement costs.

Call us about this impressive improvement. Be laugh-out-loud confident ... whether you're in front of, or behind, the camera!

In-Office Coverage Plan

We at *Team Dental* understand that with the current economic times it can be difficult to maintain your optimum dental health and that waiting around for healthcare reform could take years! We have created an **In-Office Coverage Plan** that allows you to preserve your oral health and provide you the opportunity to increase your smile power! Whether you have insurance or not, this plan is truly an incredible benefit!

Coverage is available for patients without insurance and patients with insurance who have reached their maximum allowable coverage.

Applies after insurance maximum has been reached or if you pay more with your coverage, the lesser of the two applies.

Dear Neighbor,

I think I'm safe in saying that a major part of every dentist's philosophy of care is to share information that promotes health. I hope you enjoy receiving my newsletter – as a member of your community; it's my way of extending a neighborly smile and fulfilling my commitment to dental education.

My name is *Dr. Michael E. King*, owner of *Team Dental at River Oaks*. My team and I have been providing cosmetic and comprehensive dentistry to the Prince William area for over 12 years.

I am a *United States Navy Veteran*, served at *Quantico Marine Corps Base* and aboard the *USS Nashville LPD-13*. I graduated from *Virginia Tech (Microbiology)* and from the *University of Maryland Dental School (DDS)*, currently ranked the #1 dental school in the world!

I established *Team Dental at River Oaks* with one thing in mind, to be able to provide the best dental care possible for the people of my community – and make it affordable!

At *Team Dental*, our mission is simple but yet unique to each individual that comes into our office: *To Provide the Highest Quality of Dental Treatment, Education and Training to ourselves and our patients.*

It is my personal commitment to provide my patients with all the information they need to ensure excellent oral health in addition to providing dentistry that will help them smile for a lifetime.

We welcome you to join our practice, but first, why don't you come in and meet our team, to know you're making the right decision.

Yours in good dental health,

Dr. Michael King
